

24 February 1987

MEMORANDUM FOR: Director, Foreign Broadcast Information Service

VIA: Deputy Director for Administration
Deputy Director for Science and Technology

FROM: John M. Ray
Director of Logistics

SUBJECT: Assistance Rendered [redacted]
[redacted]

1. For some time we have been groping with the very important problem involving our automated data processing (ADP) efforts within the Office of Logistics (OL). Given the importance of this effort, its significant impact on the ability to carry out our support mission, and the resources involved, we were very much in need of an objective, "outside" review of the management of ADP in OL.

2. Several months ago, [redacted] graciously consented to provide us with an independent assessment of our approach to ADP. I have just read the study which they submitted, dated 20 January 1987. They very thoroughly surveyed the direction in which we are going with respect to the Commercial Logistics Applications System, the Data Administration Service, and the DA/OL data processing career service (MLD). They also provided more general recommendations regarding the more effective utilization of our ADP resources. The study will be thoroughly examined and discussed by our senior line managers in an offsite conference in March of this year. The work done by [redacted] provides us with an excellent focus on our ADP posture. It will make a significant contribution as to how we will be conducting our business over the next five years.

3. I would like to take this opportunity to thank you for allowing [redacted] to undertake this study for us, and I would like to officially recognize their outstanding work on our behalf. Please convey to each of these fine officers our thanks and appreciation for a job well done.

[redacted]
John M. Ray
